

DIANA NDINDA

Software Developer | Data Scientist | Nairobi, Kenya | museediana@gmail.com |
+254 (0)113741711

 [LinkedIn](#) |  [github](#) |  [Portfolio Website](#)

PROFILE

Innovative **Software Developer & Data Scientist** with expertise in building **scalable applications, data-driven solutions, and interactive dashboards** that drive business transformation. Skilled in **predictive modeling, prescriptive analytics, REST API development, and cloud deployments (Azure, Docker)**. Experienced in working with **large datasets, data pipelines, and enterprise systems** across industries including **banking, insurance, energy, and humanitarian services**. Adept at **problem-solving, cross-functional collaboration, and delivering end-to-end solutions** that align technology with organizational goals.

EXPERIENCE

Software Developer / Pathways Technologies, Nairobi, Kenya | Mar 2023 – Present

- **Highlighted Projects & Contributions**
- **Serengeti Energy – Laravel App (Mar 2023 – Jul 2023; ongoing support)**
Led the development of a **custom Laravel application** for renewable energy project management. Designed and implemented **database schemas, REST APIs, and role-based authentication**, ensuring **scalability, performance, and security**. Provide ongoing maintenance and feature upgrades.
- **Kenya Red Cross – ChatCare Chatbot & UI (Jul 2023 – Present)**
Designed the **UI/UX** and implemented the **ChatCare chatbot**, integrating natural language processing to support humanitarian services. Connected backend services for **real-time responses** and continue to **maintain and optimize** the system.
- **IQRAF – Project Management System (PowerApps & Laravel) (Oct 2023 – Jan 2024)**
Built a **hybrid project management solution** combining **Power Apps workflows** with a **Laravel backend**, delivering modules for **task assignment, approvals, and reporting**. Integrated Power Apps with Laravel APIs for smooth data exchange.
- **National Bank of Kenya – Data Science & Power BI Training (Jan 2024)**
Delivered **corporate training** on **data science and Power BI**, guiding bank staff on **data cleaning, modeling, and dashboard development**. Designed practical exercises with **real banking datasets**, enabling participants to build actionable insights.
- **Minet Insurance – Spring Boot Microservice & QA (Mar 2024 – Oct 2024)**
Engineered a **Spring Boot microservice** for **real-time notifications** (email, SMS, dashboard). Implemented **event-driven architecture**, conducted **unit, integration, and load testing**, and integrated with enterprise systems for reliability at scale.
- **Bonafide Bank – Core Banking System (Java) (Dec 2024 – Mar 2025)**
Contributed to the **Java-based core banking platform**, focusing on **transaction processing, security, and reporting APIs**. Enhanced **data integrity and audit trails** to

ensure compliance, while improving **system scalability** for high-volume transactions.

- **Centenary Bank – Core Banking System (Java)** (Mar 2025 – Present)
Developing **backend modules and microservices** for Centenary Bank's **core banking system**, including **fraud detection workflows, customer management, and real-time reporting**. Supporting deployment and optimization for **enterprise-grade reliability**.
- **InsightGrid – Data Analytics Platform (Next.js, Power BI, Tableau)** (May 2025 – Present)
Leading the development of **InsightGrid**, a **Next.js web platform** that allows users to build, embed, and share **interactive data dashboards**. Integrated **Power BI and Tableau embedding**, built **modular visualization components**, and designed secure **multi-user APIs** for scalability.

*Software Developer Intern / CorkBrick Europe, Portugal (Remote) /
May 2022 - Nov 2022*

- Developed a game system using Unity and Blender, integrating engaging UI designs using Figma. [link to demo game](#)
- Designed and implemented the project's database and authentication system.
- Contributed to UI/UX enhancements, ensuring a seamless user experience.

*Embedded Systems Intern / Emertxe, Bangalore, India (Remote) /
Feb 2022 - May 2022*

- Learned embedded systems and IoT.
- Developed a simulation model for an IoT-based smart washing machine.
- Analyzed sensor data to optimize machine efficiency and performance.

*IT Officer Intern / Office of the Attorney General, Nairobi, Kenya /
Feb 2021 - Apr 2021*

- Developed a records-keeping system for the legal aid team using Laravel, which will be deployed in June 2022.
- Designed wireframes and UI layouts using Figma to ensure a user-friendly experience.
- Troubleshooted, updated, and debugged the institute's software and hardware to ensure smooth system operation.
- Developed skills for user support and communication. [link to national legal aid service](#)

PROJECTS

- National Legal Aid Service | Djangol, Figma | <https://portal.nlas.go.ke/login>
- Waste Assistant using IoT | Arduino, Android, Firebase, Figma | https://github.com/afrochic/waste_assistant.git
- CorkBrick Game (1000+ downloads) | Unity, Blender, Figma | <https://corkbrick.com/pages/corkbrick-play>
- Clone Technologies Website (2022) | Laravel, Figma, Illustrator | <http://clone-technologies.com/>
- Afro Chitchat | Mobile Chat App | <https://github.com/afrochic/afrochicChat.git>
- Red Cross | <https://www.redcross.or.ke/>

EDUCATION

Master of Science in Data Science & Analytics | Strathmore University, Nairobi, Kenya | May 2025 – Present

Bachelor of Science in Informatics and Computer Science | Strathmore University, Nairobi, Kenya | Apr 2018 – Jan 2022

SKILLS

Programming & Development

- Python (Django, Flask), Java (Spring Boot), PHP (Laravel), JavaScript (Next.js, React), C++, SQL
- REST API development, microservices architecture, multithreaded pipelines, backend optimization

Data Science & Analytics

- Predictive & prescriptive modeling, machine learning (TensorFlow, PyTorch), sentiment analysis
- Data wrangling, statistical modeling, ETL workflows (Airflow, NiFi), experiment tracking (MLflow)
- Data visualization & BI tools: Power BI, Tableau, Figma dashboards

Cloud & Deployment

- Microsoft Azure (VMs, App Services), Docker (containerization), GitHub Actions (CI/CD)
- Cloud-native system design, scalable deployments, API integrations

Tools & Platforms

- Databricks, Azure Data Lake, Firebase, Jupyter Notebooks, Unity, Android Studio, Git/GitHub
- Design & visualization: Figma, Illustrator, Blender

Soft Skills

- Strong problem-solving & strategic thinking
- Cross-functional collaboration & client-facing training
- Communication, adaptability, resilience, and innovation mindset

ACTIVITIES

- Volunteer: Sunday School teacher and Secretary at IDCC Church, Makadara, Nairobi, Kenya (Feb 2019 - Apr 2019)
- Volunteer: Website development teacher at Highway Secondary School, Kenya (Aug 2021 - Dec 2021)
- Professional Swimmer: Participated in national competitions (2009 - present)

- Cooking: Runs a YouTube channel for recipes (Afrochic__)
